- **CUSTOMIZED LOUVERS WITH LOGO**

# OVERVIEW

## BIO GRANULATED LOUVERS

- **BIO GRANULATED LOUVERS**

Plastics are predominantly produced from environmentally harmful and highly volatile petroleum in terms of price.

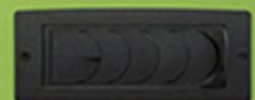

AURORA invests in sustainable products made from renewable raw materials that are biodegradable to protect the environment. Bio granulate can now be used to produce high-performance components with excellent mechanical and optical properties.

The first prototypes of the bio granulated louvers have already been produced. Further information on request.
